

PWM Channel y ($y = 1$ or 2) managed by external trigger
 External Trigger Mode: $\text{PWM_ETR}1.\text{MODE} = 3$ (Cycle-by-Cycle Duty Mode)
 Recoverable management would have the same behavior with another external trigger mode

PWM Channel x affected by the fault y: $\text{PWM_FPE}x[y] = 1$

PWM Channel z affected by the fault y: $\text{PWM_FPE}z[y] = 1$
