

Step 1

[Specify thing properties](#)

Step 2 - optional

Configure device certificate

Step 3 - optional

[Attach policies to certificate](#)

Configure device certificate - *optional* [Info](#)

A device requires a certificate to connect to AWS IoT. You can choose how to register a certificate for your device now, or you can create and register a certificate for your device later. Your device won't be able to connect to AWS IoT until it has an active certificate with an appropriate policy.

Device certificate

☒ **Auto-generate a new certificate (recommended)**
Generate a certificate, public key, and private key using AWS IoT's certificate authority.

☐ **Use my certificate**
Use a certificate signed by your own certificate authority.

☐ **Upload CSR**
Register your CA and use your own certificates on one or many devices.

☐ **Skip creating a certificate at this time**
You can create a certificate for this thing and attach a policy to the certificate at a later time.
