```
sam9x60-curiosity@demo:~$ ./sam-ba -p secure --device sam9x60:0:1 -a bootconfig -c help
SAM-BA Command Line Interface Tool v3.9.1 (linux - x86_64-little_endian-lp64)
Copyright 2025 Microchip Technology
 * readcfg - read boot configuration
Syntax:
    readcfg:(bcp-otp|bcp-emul|uhcp-otp|uhcp-emul|sbcp-emul|sbcp-otp|bscr)
Examples:
    readcfg:bcp-otp    read the boot config packet from OTP matrix
    readcfg:bcp-emul   read the boot config packet from OTP emulation mode
    readcfg:uhcp-otp   read the user hardware config packet from OTP matrix
    readcfg:uhcp-emul  read the user hardware config packet from OTP emulation mode
    readcfg:sbcp-otp   read the secure boot config packet from OTP matrix
    readcfg:sbcp-emul  read the secure boot config packet from OTP emulation mode
    readcfg:bscr       read the boot sequence register (BSCR)

 * writecfg - write boot configuration
Syntax:
    writecfg:(bcp-otp|bcp-emul):<boot_config_text>
    writecfg:(uhcp-otp|uhcp-emul):<user_hw_config_text>
    writecfg:(sbcp-otp|sbcp-emul):
    writecfg:bscr:<bscr_value>
```
