

Error

The Environment variable 'MSCC\_ROOT\_1' specified for the root directory path for linked files in the project you are trying to open is not defined/set in your environment. Please make sure to set the appropriate root directory path in this Environment variable before you open Libero. You will need to exit Libero and open a new session for any changes you made to the directory path set in the Environment variable to reflect here and allow you to open the project.

OK
